#androidwear

#androidwear

More connected to the people around you, and those not with you right now

#androidwear

Technology

- **Should not require all our attention**
- **Require least amount of cognitive overhead**
- **Provide information without distraction**
- **Compress information**

Establish Connection

#androidwear

GoogleApiClient

```
mGoogleApiClient = new GoogleApiClient.Builder(context)
    .addApi(Wearable.API)
    .addConnectionCallbacks(this)
    .addOnConnectionFailedListener(this)
    .build();
```

Establish Connection

In Activity

@Override

```
protected void onStart() {  
    super.onStart();  
    mGoogleApiClient.connect();  
}
```

@Override

```
protected void onStop() {  
    super.onStop();  
    mGoogleApiClient.disconnect();  
}
```

#androidwear

Node

Know when two devices are connected

Message

exchange **low latency messages**
OR

Data

Store data that is shared between
phone and wearable

#androidwear

Method

```
PendingResult<GetConnectedNodesResult>  
getConnectedNodes(GoogleApiClient  
client);
```

Listener

```
public interface NodeListener {  
    void onPeerConnected(Node peer);  
    void onPeerDisconnected(Node peer);  
}
```

Method

```
PendingResult<SendMessageResult>  
sendMessage(GoogleApiClient client, String nodeId, String action, byte[] data);
```

Listener

```
public interface MessageListener {  
    void onMessageReceived(MessageEvent messageEvent);  
}
```

Methods

```
PendingResult<DataItemResult>  
    putDataItem(GoogleApiClient client, PutDataRequest request);
```

```
PendingResult<DataItemResult>  
    getDataItem(GoogleApiClient client, Uri uri);
```

Listener

```
public interface DataListener {  
    void onDataChanged(DataEventBuffer dataEvents);  
}
```

Service

```
public class MyListenerService extends WearableListenerService {  
    ...  
}
```

Intent Filter

```
<service android:name=".MyListenerService" >  
    <intent-filter>  
        <action android:name="com.google.android.gms.wearable.BIND_LISTENER" />  
    </intent-filter>  
</service>
```

System provided voice action

```
<activity android:name="MyNoteActivity">  
  <intent-filter>  
    <action android:name="android.intent.action.SEND" />  
    <category android:name="com.google.android.voicesearch.SELF_NOTE" />  
  </intent-filter>  
</activity>
```

- Call a car/taxi
- Take a note
- Set alarm
- Set timer
- Start/Stop a bike ride

- Start/Stop a run
- Start/Stop a workout
- Show heart rate
- Show step count

App provided voice action

```
<activity android:name="StartRunActivity" android:label="MyRunningApp">  
  <intent-filter>  
    <action android:name="android.intent.action.MAIN" />  
    <category android:name="android.intent.category.LAUNCHER" />  
  </intent-filter>  
</activity>
```

#androidwear

Speech Recognizer

```
private void displaySpeechRecognizer() {  
    Intent intent = new Intent(RecognizerIntent.ACTION_RECOGNIZE_SPEECH);  
    intent.putExtra(RecognizerIntent.EXTRA_LANGUAGE_MODEL,  
  
        RecognizerIntent.LANGUAGE_MODEL_FREE_FORM);  
  
    startActivityForResult(intent, SPEECH_REQUEST_CODE);  
}
```
